### **REVENUE MANAGEMENT**

#### **OPERATING REVENUE BY SOURCE: YEAR TO DATE ACTUAL VS YEAR TO DATE BUDGET**

##### ***Property Rates***

The negative variance of 31% is due to change in some categories of properties as per supplementary valuation roll and also to large number of vacant sites which are not utilised properly.

**Conclusion: Downwards adjustment will be made by assessing the individual category of debtors against the actual revenue recognised and budgeted revenue in the first half of the year.**

***Service Charges-Electricity Revenue***

The service charges on electricity performed poorly with a negative variance of 22%. This particular service is dependent on the existence of property, the large number of vacant sites indicate that development is very slow and service could not be charged.

**Conclusion: Downwards adjustment will be made on the electricity service Charge for the year.**

***Service Charges-Refuse Revenue***

The service charges on refuse removal had a negative variance of 1% which is no material.

**Conclusion: No adjustment will be made on the refuse removal service charge for the year.**

***Rental of Facilities and Equipment***

**Conclusion: Upwards adjustment will be made on rental of facilities and equipment for the year.**

***Interest Earned-External Investments***

This revenue source is more dependent on grant received from National Department. The negative variance of -1% is not material.

**Conclusion: No adjustment will be made on interest earned on external investments for the year.**

***Fines, Penalties and Forfeits***

The negative variance of 91% was due failure in raising of fines which resulted in a decrease in revenue than anticipated on initial budget compilation.

**Conclusion: Downwards adjustment will be made on fine, penalties and forfeits for the year.**

***Licences and Permits***

The negative variance of 2% is not material.

**Conclusion: No adjustment will be made on licences and permits for the year.**

***Transfers and Subsidies***

The positive variance of 83% is mainly attributable to the receipt of the second tranche of the Equitable Share grant from National Treasury and other grants.

**Conclusion: The adjustment will be made in line with Adjustment Division of Revenue Act (DORA).**

***Other Revenue***

This category of revenue relates to revenue sources that are not explicitly disclosed on the statement of financial performance as per National Treasury reporting templates such as clearance certificates and other sundry revenue. This category reflects under performance variance of 65% and will be accordingly be adjusted during the adjustment budget.

**Conclusion:** Each line item in this area will be analysed considering the performance of the first half of the financial year and necessary adjustment will be accordingly effected.

**The inputs from each department that contributes revenues to the municipality is critical as they fully understands what causes the variances.**

**EXPENDITURE MANAGEMENT****OPERATING EXPENDITURE: YEAR TO DATE ACTUAL VS YEAR TO DATE BUDGET*****Employee Related Costs***

The performance of this line item of expenditure is above the projected budget for the first half of the financial year and this resulted in a variance of 7%. Resulting from filling post that were not budgeted and also overtime. This was also contributed to by the payment of acting salaries for the senior management as there were management on suspension.

**Conclusion:** Downwards adjustment will be made.

***Remuneration of Councillors***

The performance of this line item of expenditure is within the projected budget and this resulted in a variance of positive 3%. The councillors salaries in terms of Determination of upper limits of salaries, allowances and benefits of different members.

**Conclusion:** The adjustment will be made based on the recent Notice No.11440 as published Government Gazette No.46470 of 2 June 2022 on salaries increases for councillors.

***Debt Impairment, and Depreciation and Amortisation***

These items are explained in the above summary.

***Finance Charges***

The performance of this line item of expenditure was above the projected budget for the first half of the financial year and this resulted in a positive variance of 284% due to late payment of suppliers.

**Conclusion:** Upwards adjustment will be made on finance charges for the year.

**Bulk Purchases**

The expenditure performance on purchase of electricity has a negative variance of 14%. The Eskom billing for December is being payable in January. Load shedding contributed to lower billing.

**Conclusion:** There would be no adjustment on bulk purchases for this year.

***Other materials***

The expenditure performance on other materials has favourable variance of 1%.

**Conclusion:** No adjustment will be made on other materials for the year.

**Contracted Services**

This category of contracted services relates to expenditure types that are not explicitly disclosed on the statement of financial performance as per National Treasury reporting templates such as audit committee fees and other contracted expenditure. This category reflects favourable variance of 8% and will be adjusted during the adjustment budget.

**Conclusion:** Each line item in this area will be analysed considering the performance of the first half of the financial year and necessary adjustment will be accordingly effected.

***Other Expenditure***

This category reflects a negative variance of -69% and will be accordingly be adjusted during the adjustment budget.

**Conclusion:** Each line item in this area will be analysed considering the performance of the first half of the financial year and necessary adjustment will be accordingly effected.

## **CAPITAL EXPENDITURE**

**Total Capital Expenditure – Actual vs. Budget**

Table C5 indicates expenditure incurred during this period amounts to R15 522 724.98 million against the budget of R27 788 499 million, which resulted to an undesirable variance of R 12 265 774.02 million.

Half yearly capital expenditure performance reflects the following per department:

- Governance and Administration over performed by 5%.
- Technical Services (Roads) over-performed by 95%

**Conclusion: The adjustments of the capital budget will mainly depend on the departmental inputs received and the funding availability of the municipality.**

## **ASSET MANAGEMENT**

The asset module has assisted the municipality to comply with mScoa. The safeguarding of asset is still a going concern and management need to monitor that very closely. The current ratio is slightly below the norm this is an indication that municipality should introduce new strategies of improving the current situation.

## **CASH MANAGEMENT**

**Table C7** indicates that the municipality is financially sustainable and able to discharge its financial commitment when they fall due and is also expected to be financially stable in future.

The total debtors outstanding of R73 656 850 million represent an increase of R22 017 457 million, which is about 30% compared to December 2021. The COVID 19 and non-implementation of legal process contributed in the increase of the municipality debtors book.

## **Debt Collection Activities**

There are number of issues which are impacting to debt collection. The illegal connection of electricity is the major one and is not only impacting on revenue but even on cash flows. Delay in approving of indigent applicants contribute in this high debtor's book. The process of reminding customers about the outstanding debt should be the priority in public participation events while the legal process should commence soon, this would improve the revenue base of the municipality. The current control system will be monitored continuously.

## **CREDITORS**

Creditors are normally paid within 30 days as stipulated by the MFMA except where there are disputes between the municipality and the creditor. But due to cash flow problems there were delays in paying some creditors.
